IN THE CLAIMS

1-14. (canceled)

15.(new): A mouthwash antibacteric composition in the form of a stable emulsified opaque liquid for sanitizing a user buccal cavity and forming through the buccal cavity and on user teeth an oil film resistant against water rinsings, said antibacteric composition comprising an oil phase and an aqueous phase, antiseptic substances dissolved in said oil phase and water soluble antibacteric substances dissolved in said aqueous phase, wherein said aqueous phase varies from about 60% w/w to about 95% w/w and said oil phase varies from about 5% w/w to about 40% w/w of said mouthwash antibacteric composition, and wherein said oil phase comprises vegetable oils, mineral oils, aromatic oils, aliphatic esters, aliphatic ethers, aliphatic alcohols, triglycerides and aliphatic hydrocarbons.

16.(new): A composition, according to claim 15, wherein said water soluble antibacteric substances comprise moistening agents, alcohols, fluorinated salts, sweetening substances, coloring substances and pH adjusters.

17.(new): A composition, according to claim 16, wherein said moistening agents are selected from glycerol, sorbitol, xylitol, glycoles, said alcohols are selected from ethyl alcohol and propyl alcohol and said sweetening substances are selected from saccharine and aspartames.

18.(new): A composition, according to claim 15,
wherein said composition comprises an oil-in-water
(o/w) emulsifying system.
